

ZGF Architects LLP is an award-winning architectural, planning, and interior design firm with offices in Portland, Seattle, Los Angeles, Washington, DC, New York, and Vancouver, BC. Our portfolio features a diverse mix of projects for both private and public institutions, including work for healthcare, research, academic, civic, corporate, and commercial clients.

ZGF Interiors was established to provide clients with original and imaginative interior design. These individuals bring extensive experience in programming, space planning, interior architecture, and branding environments. The success of the group's design results from sensitively working in concert with the architectural design to refine, enhance, and strengthen the final project, and to achieve a strong relationship between the architecture and interior design. We understand current trends influencing workplace design, and aim to create spaces that promote communication, foster collaboration, and increase efficiency and productivity, while enhancing employee satisfaction.

Our design philosophy is centered on the premise that excellence should be reflected in each and every aspect of a building—its fit within the community and campus, its function and relationship to its users, its building systems, and its cost. This dedication to design excellence at every level has resulted in numerous national, regional, and local awards, including the prestigious Architecture Firm Award from the American Institute of Architects, which recognizes the firm's "high standards, humanistic concerns, and unique ability to capture the spirit of a place and the aspirations of its inhabitants." Additionally, we have been recognized with numerous interior design awards, including the IIDA Firm Award.
