

## HANNA ANDERSSON

Headquarters PORTLAND, OREGON

**HANNA ANDERSSON, A PORTLAND-BASED CHILDREN'S CLOTHING COMPANY, ENGAGED WITH ZGF TO RENOVATE 43,400 SF OF SPACE IN ADJACENT TWO-STORY HISTORIC BUILDINGS IN PORTLAND FOR ITS HEADQUARTERS.**

The transformed space speaks to the company's culture of collaboration and innovation with the key driver in the design being openness and transparency. The new layout allows departments to easily and naturally collaborate in the process of design and merchandising. It includes expanded design and conferencing space for 12 departments in an entirely open office environment, while also allowing room for anticipated employee growth and brand evolution in the coming years.

The building is comprised of two floors with an open connecting staircase. It is influenced by the brand's Scandinavian roots of simple, clean lines, natural woods

and concrete, and maximized daylight. A backdrop of white walls, reclaimed with a whitewash finish, white Corian countertops, and white laminate and birch workstations serve as a canvas for the brightly colored and patterned textiles that the Hanna Andersson brand is known for. The new office includes areas for the resource library, customer service center, bistro, and catering kitchen with an adjacent event space. Throughout the facility, informal gathering spaces have been created for collaboration.

The wall between the two historic buildings was partially removed to provide openness and connectivity. Original Douglas fir columns were stripped and a new ceiling system with exposed ductwork was installed to provide continuity in look and feel across the two buildings.
